

British designed and patent protected

FENCE MASTER®

Safe, effective post removal in under 2 minutes

- **4 tonnes of pulling force**
- **No digging required**
- **Extract post footings up to 600mm diameter**

We specialise in fast, safe fence post removal

Our unique post removal system is designed to take the strain out of removing fence posts of all shapes and sizes: fence posts, street signs, and gateposts to motorway barrier posts. Used by both fencers and landscapers, the Fence Master® is the best in its class of innovative machinery.

Special claw attachment

For broken-off or rotten posts, the bespoke claw attachment can be used with Fence Master® to easily remove concrete foundations

FENCE MASTER®

Specification

Model	M730-2
Width (mm)	730
Height retracted (mm)	1070
Height extended (mm)	1470
Length	1040
Operating mass without claw (kg)	103
Operating mass with claw fitted (kg)	116
Operating mass of claw (kg)	12.9
Pulling force (kgf)	4000
Pulling force (KN)	39.22
Power source	Handpump
Max dia. footing removed (mm)	600

Who we are

Post Pullers

At Postpullers UK Ltd, we are an award-winning manufacturer of a range of innovative machines for the easy removal of posts. Our machines are widely used in landscaping, highways and telecommunication sectors by a huge range of established brands.

Alongside Fence Master®, we have developed our multi-award-winning Barrier Master®, a special-purpose attachment for VRS posts and lighting columns, used on highways across the country.
